FOR INVESTORS & VCS

UNICO for Investors

We tell you whether the technology works, whether the IP holds and whether the start-up is ready.

Deep-tech deals are hard to assess: the science is complex, the IP decides the value and generalist analysts rarely have the expertise for every field. We give investment teams a fast, independent technology and IP view.

Commercial-first, not legal-only, and delivered in 2–3 weeks. Stop overpaying for legal-only IP reports.

How we help

Tech & IP Due Diligence — on request

Six-area risk analysis of a target: technology, competition, IP, team, market and finance, with red flags and recommendations.

IP Strategy & FTO for portfolio companies — from €1,600

Commercial-first FTO analysis and IP strategy that make your portfolio companies more defensible.

Investor Readiness Analysis — from €3,500

A structured readiness check of start-ups in your pipeline or accelerator, with a traffic-light score.

Company Valuation — from €3,500

An independent, data-driven valuation of a deep-tech company, including its IP and team.

Technology Scouting — from €7,500

A map of technologies and start-ups in a field to support your investment thesis or deal flow.

Why investors work with us

01

We detect technology and IP risks

That is our core expertise. We rule out technology bullshitting with input from our expert network.

02

Backed by data

Professional patent, trademark and company databases, not opinions.

03

Fast

2–3 weeks, ideal when your own analysts are at full capacity.

04

We know both sides

We help start-ups prepare for investors, so we know where they typically fall short.

CB ESPRI: risk analysis for an investment decision

THE SITUATION

The Slovak impact fund CB ESPRI was considering an investment in a technology company and needed to know at short notice what technology and IP risks it might entail.

WHAT WE DID

We analysed six areas, verified the technology with our expert network, checked IP protection and know-how ownership and reviewed team, market, finances and legal structure.

THE RESULT

The fund received a comprehensive summary with recommendations and highlighted red flags for each area, while its own analysts were busy closing other deals.

> *"We used Technology & IP risk analysis during a period when we were closing a large number of projects at once and faced a lack of capacity of our analysts. UNICO provided us with in-depth risk analysis in a short time in areas where they have unique expertise."*
>
> **Miroslav Beblavý**, CB ESPRI

Next step

Send us a target company or a field you are looking at. We will confirm the scope and the delivery date.
